

## COLUMBARIUM

The Dorchester Union Cemetery has three Columbarium's that are located along the northwest side of the cemetery.

- A Columbarium is an above ground unit which provides an alternative for cremation burials
- Each columbarium consists of 72 niches; 36 on the east side and 36 on the west side
- The niches are 1' x 1' x 1'
- Two urns are permitted to be inurned in each niche
- There are four levels of niches ranging in price (see price list under Dorchester Union Cemetery on cemetery page)
- A bronze memorial plaque is required to be purchased at the time a niche is purchased
- No flowers are permitted to be placed in front of the Columbariums, however there is a flower bath located in the center of the Columbarium area for any flowers/plants for those inurned in the Columbariums
- The Rules and Regulations for the Columbarium are outlined in the Regulations by-law.
